Nordco Rail Services & Inspection Technologies Promotes Jim Rose to Program Manager – Rail Inspection.

Jim Rose brings 22 years of rail experience to his new role as Program Manager in the Rail Inspection division.

Ridgefield, CT. – August 9, 2012 – Nordco Rail Services & Inspection Technologies, Inc. announced today that it has promoted Mr. James Rose to Program Manager – Rail Inspection. In this role, Mr. Rose will help Nordco develop strong relationships with key accounts. In addition, Mr. Rose will retain his Field Manager responsibilities as well as assist with rail inspection operational support, recruitment, and supplier management.

“With Jim’s strong people skills and engineering background, he will be able to quickly connect with key customers to ensure our service and technology offerings stay on track with our customer’s needs” said Nordco Rail Services & Inspection Technologies President, Pat Graham.

Mr. Rose is a licensed professional engineer and has over 22 years of experience in the engineering, construction and rail industries. He holds a B.S. from University of Nebraska in Civil Engineering.

Nordco Rail Services and Inspection Technologies is a leader in non-destructive testing solutions for railroad, compressed gas, and other industries. The Rail Inspections division is one of the industry’s leading suppliers of rail flaw ultrasonic testing inspection systems and services.

We are pleased to welcome Mr. Rose to his new position and look forward to his contributions towards our success.
