

BULLETIN NO. 282

DATE: November 17, 1998

MACHINE: **Hydra-Hammer Model A, B, B-2
M3-B, M3-C
Model C Spiking Machine
Anchor Applicator Model E**

SERIAL
NUMBER(S): **All with John Deere Engines**

SUBJECT: **Engine Door Latch Kit 98410022**

There has been some problem keeping the door latches tight on the John Deere engines. The latches could loosen, allowing the door to fall off.

To solve this problem the 98410022 Engine Door Latch Kit has been set up to provide a heavy-duty latch. The kit consists of a heavy-duty latch, mounting hardware and an installation print. One kit is required per door.

The heavy-duty latch will be standard equipment on future John Deere engines.
