

RECOVER TRACTIVE EFFORT **AIR KNIFE** UNDER THE TOUGHEST CONDITIONS

NOW **STANDARD** ON ALL NAVIGATOR & COMMANDER SERIES

CLEAR TRACK OF WATER, SNOW/SLEET, AND OTHER DEBRIS.

RECOVER LOST TRACTION IN THE MOST ADVERSE WEATHER.

RETROFIT MOST SHUTTLEWAGONS

A Shuttlewagon Certified Technician can install an air knife system on site in typically one day. Also available on the dual railwheel.

CLOSE TO THE RAIL

The air knives proximity to the rail provides improved tractive effort in adverse conditions.

ATTACHES TO RAIL GEAR

The air knife attaches to the rail gear, protecting it while in road mode.

MOVE MORE RAILCARS

Test results reflect that a Shuttlewagon equipped with an air knife system can move more railcars in wet/wintery conditions than a railcar mover without this feature.

MORE POWER TO TRAIN BRAKE

The air knife system will not steal air from the train brake reservoir but can provide the train brake reservoir with additional air capacity to assist in train brake charging time.
