Nordco Parts Adds a New Team Member

If you have called the Nordco Parts Department recently you may have heard a new voice on the phone. Jim "J.J." Joerres has joined the group as a Customer Service/Technical Support Representative. J.J. brings a wealth of hands-on knowledge of maintenance-of-way machinery to his new role. He most recently was a member of Nordco's test track team, doing final inspections and testing of machines prior to shipment.

Spiker Manifold Covers Kit Update

Nordco has made several modifications to the CX Hammer Manifold Covers Kit to improve the fit of the covers on the machine. As a result, there is a **new part number, 96412912**, which replaces 96412822. The Manifold Covers Kit consists of a set of five steel covers that shield the manifold valve stacks from debris, rain, snow and ice. This helps prevent damage to bolts, valves and O-rings, reducing the need for maintenance and making it easier to service the machine in the field. The kit includes mounting hardware and installation instructions.

96412912 Manifold Covers Kit. Clear viewing panels make it possible to inspect components without removing the covers.
