

# Maintenance-of-Way Equipment

## About the Company

Nordco is a major supplier to North American Class 1 railroads, regional and short-line railroads, public transit systems, railroad contractors, equipment leasing companies, and rail mills. Nordco also serves industries that rely heavily on rail transportation, including port authorities, agriculture, mining, chemicals, and energy.

## Major Product Lines

### Adzers

Our adzer products include:

- Ride-On Adzer.

### Anchor Machines

Our anchor-related products include:

- Anchor Adjuster Two-Rail (AA2R)
- Anchor Applicator Single-Rail
- Anchor Remover (AK67)
- Bulk Automatic Anchor Machine (BAAM)

### Ballast Regulators/Cribbers

Our ballast-related products include:

- Ballast Regulator (M7)
- Cribber
- Single-Tie Cribber

## Key Products and Services

### Maintenance-of-Way Equipment

- New equipment
- Rebuilt equipment and rebuild services
- Rentals

### Parts & Kits

- Repair, upgrade, spare parts, preventive maintenance, and productivity/operator comfort enhancements
- Exchange components
- Critical machine component packages

## Clearing Right-of-Way

Our clearing-related products include:

- Brushcutter (BC60)
- Snowfighter (M7)

## Clip Machines

Our clip-related products include:

- Clip Applicator (Nipper Clipper)
- Spring Clip Applicator (NSCA)
- Vossloh Clip Applicator/Remover (NVCAR)

## Cranes

Our crane-related products include:

- 18-Ton Rail Crane

## Gage-Related Machines

Our gage-related products include:

- Self-Propelled PreGager (SPG)
- Trak Inspector

## NordStar

Our proximity awareness-related products include:

- NordStar Machine Proximity Awareness System
- NordStar Personal Proximity Awareness System
- NordStar Points of Interest Proximity Awareness System
- NordStar Remote Access Control and Monitoring System
- NordStar Trackside Warning System

## Rail Lifters / Plate Inserters

Our lifter/inserter-related products include:

- Rail Lifter (AutoLift)
- Rail Lifter (HydroLift)
- Ride-On Plate Inserter (RPI)

## Rail Trains

Our rail train-related products include:

- Mini Rail Train

## Screw-Related Machines

Our screw-related products include:

- Production Screw Spiker (PSS)
- Screw Remover
- Small Screw Spiker

## Spike-Driving Machines

Our spike-related products include:

- Curve Gang Spiker (CGS)
- Production Spike Driver (CX Hammer)
- Production Spike Driver with Auto Spike Feeder Option (CX Hammer)
- Production Spike Driver (SE Hammer)
- Small Spiker (SS Spiker)

## Tie Equipment

Our tie-related products include:

- Tie Remover/Inserter (TRIPP)
- Tie Shear

## Spike-Pulling Machines

Our spike pulling-related products include:

- Spike Puller Single-Sided (Super Claws)
- Spike Puller Two-Rail (SP2R)

## Tie Pluggers and Drills

Our plugger and drill-related products include:

- Quad Drill Two-Rail (QD2R)
- Tie Plugger (NETP)

## Tampers

Our tamper-related products include:

- Hydraulic Switch Tamper (HST)
- Production Tamper (Jackson 6700 - Rebuilt)
- Production Tamper (Mark IV - Rebuilt)

Nordco designs and builds a wide range of maintenance-of-way equipment - the machinery used to lay, repair, clear and maintain railroad track structure.

Our equipment includes Spike Drivers and Pullers, Tie Exchangers, Ballast Regulators, Snow Removal Equipment, Brush Cutters, Rail Lifters, Clip Applicators and Removers, Anchor Applicators and Removers, and more.

Our machines are the industry standard for surface maintenance, right-of-way clearing, and rail and tie renewal.

Our Equipment Services group rebuilds worn out and obsolete machines from the frame up, incorporating engineering upgrades and technology improvements to deliver like-new equipment with a full factory warranty.

We rebuild a wide selection of our own machines, such as CX Hammers and TRIPP Tie Exchangers. In addition, we also rebuild equipment manufactured by others, including Mark I-IV and Jackson 6700 production tampers.

In addition, we also offer an extensive inventory of parts, repair and upgrade kits, spare part kits, exchange components, and critical machine component packages.

## Ask us about...

### Rebuild Programs

Are your maintenance-of-way machines getting older and less reliable? Nordco can rebuild virtually all maintenance-of-way equipment, regardless of original manufacturer, restoring your machines to like-new status.

### Component Exchange Programs

Do you only need a replacement component, such as a workhead or axle, for your maintenance-of-way machine? You can order new or rebuilt components to be delivered directly to your shop or field operations.

### Trade-In Programs

Interested in purchasing a new maintenance-of-way machine, but wondering what to do with your existing equipment? In many cases, you can trade in your current equipment for credit towards a new machine.

### Rental Programs

Have a short-term need for a particular maintenance-of-way machine? Check our website for a current list of available rental equipment.

### Parts Availability

Need parts for your maintenance-of-way machine? Contact our part experts at 1-800-647-1724, Monday through Friday, 7:30 a.m. to 5:00 p.m. US Central Time.

Want to ensure that you order the most essential parts to keep your maintenance-of-way machine operational? Check our website or ask your parts sales representative about the available critical component kits and basic spare part kits for your machine.

Not sure what parts to order for preventive maintenance or winterization? You'll find a large range of kits available - check our website or ask your parts sales representative.
