- Remote Progressing Vehicle (RPV)

Rebuilt

Our rebuilt products include:

- Remanufactured Shuttlewagon Equipment
- Reconditioned Mobile Railcar Movers (including Shuttlewagon, Rail King, Trackmobile, and Switchmaster)

Nordco's Shuttlewagon mobile railcar movers are the only railcar movers built in America that use rubber tires for traction instead of steel wheels. This technology allows the movers to pull empty and fully loaded railcars more efficiently than comparably sized movers using steel wheels.

Models are sized and outfitted to meet the needs of your operation. They range from a drawbar pulling rating of 15,000 lbs. to more than 60,000 lbs. In addition, there is a remote-controlled model for small moving operations with limited personnel.

We use industry-standard direct-type coupling that readily connect to most American Association of Railroads (AAR) couplers. This means that our mobile railcar movers connect to railcars like a handshake. In addition, unlike railcar movers that must borrow weight by lifting railcars via the railcar's coupler, our movers use their own weight along with the superior tractive power of rubber tires to move railcars.

Ask us about...

Rebuild Programs

Are your mobile railcar movers getting older and less reliable? Nordco can rebuild virtually all mobile railcar movers, regardless of original manufacturer, restoring your machines to like-new status.

Component Exchange Programs

Do you only need a replacement component, such as an axle, for your mobile railcar mover? You can order new or rebuilt components to be delivered directly to your shop or field operations.

Trade-In Programs

Interested in purchasing a new mobile railcar mover, but wondering what to do with your existing equipment? In many cases, you can trade in your current equipment for credit towards a new machine.

Rental Programs

Have a short-term need for a particular mobile railcar mover? Check our website for a current list of available rental equipment.

Parts Availability

Need parts for your mobile railcar mover? Contact our part experts at 1-816-569-6499 (Monday-Friday, 7:00 a.m. to 4:00 p.m.). US Central Time.

Want to ensure that you order the most essential parts to keep your mobile railcar mover operational? Check our website or ask your parts sales representative about the available critical component kits and basic spare part kits for your machine.

Not sure what parts to order for preventive maintenance or winterization? You'll find a large range of kits available - check our website or ask your parts sales representative.
