**NORDCO WILL DISPLAY FOUR NEW PRODUCTS AT A SPECIAL PRODUCT SHOWCASE
DURING RAILWAY INTERCHANGE 2013**

Nordco will be bringing four brand-new products to a special product showcase event timed to coincide with Railway Interchange 2013 in Indianapolis.

This invitation-only event will be held at Victory Field (across from the Indianapolis Convention Center - 501 W. Maryland Street) on September 28, 2013, from 5:30 to 9:00 p.m.

The showcase will feature the following products:

- [Flex](#): a portable and flexible ultrasound rail flaw detection system that easily mounts to most hi-rail vehicles with Class III hitches. The Flex incorporates our patented XL9-11 wheel probe with eleven inspection transducers, pattern recognition defect classification, on-board Run-on-Run comparative analysis software, and 32-channel digital signal processing.
- [SE Hammer](#): a dramatic redesign of our best-selling CX Hammer spike driver. Just a few of the new features are: hydrostatic propel system, traction control system delivering anti-slip and feathering capabilities, proportional gager control, FX45 hammer with 33% more impact energy, and a new bulk bin design.
- [Navigator](#): a new series of mobile railcar movers. The Navigators are the only mobile railcar movers in the business to utilize a pivoting drive axle and rail guidance system all in a single assembly.
- The final product in the showcase is so new that it will be coming directly from the R&D lab, so visitors will be amongst the very first in the industry to view this exciting new product.

SE Hammer Production Spike Driver

ABOUT NORDCO

The Nordco family of companies provides an extensive selection of products and services that make it possible for rail-related industries to build, improve, maintain and inspect their track infrastructure and move rolling stock. Nordco, headquartered in Oak Creek, Wisconsin, has a long history as a manufacturer of new and rebuilt railroad Maintenance-of-Way Machinery. Today the company's product line includes in-house and on-site machinery inspection and repair; reconditioned machinery rental; mobile railcar movers; ultrasonic rail flaw testing equipment and services for railroads and other industries; and replacement parts.

Nordco operates manufacturing facilities in Oak Creek, Wisconsin; Ridgefield, Connecticut; Grandview, Missouri; and Arcola, Illinois.
