BULLETIN NO. 217

DATE: April 17, 1995

MACHINE: **Auto-Lift Serial Numbers 200 through 500**

PRODUCTION

DATES: 8/88 through Present

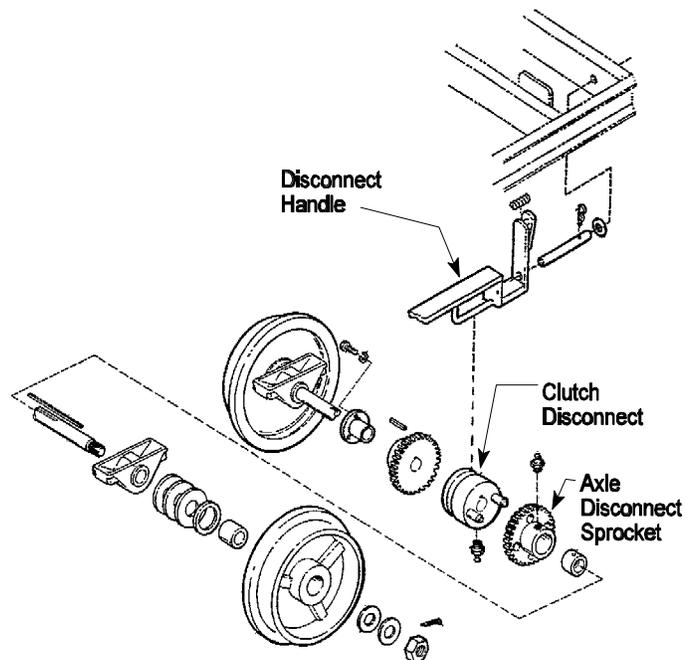

SUBJECT: Axle Disconnect Kit

The Auto-Lift Axle Disconnect Kit, part number 9879 0097, provides a convenient way to disengage the drive axle for towing. This clutch replaces the pinned sprocket arrangement which was used on machines through s/n 500.

The kit consists of a new drive axle, clutch, clutch lever, sprocket, drive chain, hardware and installation instructions.

The axle assembly must be removed from the machine. The wheels are removed from the old axle and installed on the new axle. The clutch lever pivot plate must be welded to the frame and two holes cut in the frame for the pivot pin. Total installation time should be 6 to 8 hours.

This kit will be available for shipment within 6 weeks from date of order. The price of the Drive Axle Disconnect Kit is \$1,485.00.
