

PRODUCT SUPPORT BULLETIN BULLETIN NO. 270

DATE: May 8, 1998

MACHINE: Hydra-Hammer Model B-2
Anchor Remover

SERIAL

NUMBER(S): Hydra-Hammer - 1040 and up
Anchor Remover - All

SUBJECT: Traction Control Pressure Reducing Valve

Some of these machines have experienced wheel slippage when starting to travel. A Traction Control Pressure Reducing Valve, part number 50078853, is available to correct this problem.

This valve is manifold mounted and is easily installed directly under the solenoid operated travel directional valve. The mounting bolts are included with the valve. The pressure to the travel motor can then be adjusted to prevent wheel slip. The typical setting is 2000 psi.

Please contact your NORDCO representative or the NORDCO Parts Department for price and availability.
