Claws, Super Claws and Grabber Spike Puller

SERIAL
NUMBER(S): **All**

SUBJECT: **Jackstand Kit Sale**

The NORDCO Jackstand Kit, part number 98430636, is used to support machines while working under them. The jackstand tubes engage the rail and the machine weight is supported by the rails. It is a much better method than supporting the machine on a turntable and more convenient than building a support out of ties or other material. The jackstands are permanently attached to the machine and so are always available for use. Bumpers are incorporated into the jackstand assembly as an added feature. The kit consists of 4 jackstands, 4 support brackets, 4 pins, 4 bumpers, hardware and instructions. The jackstands will support machines weighing up to 30,000 pounds when properly installed.

This kit normally sells for \$1,800.00, but for a limited time we are offering these kits at the sale price of \$1,200.00 each.

This price is good until October 1, 1998 or while supplies last.

Please contact your NORDCO representative or the NORDCO Parts Department for more information.
