

## PRODUCT SUPPORT BULLETIN BULLETIN NO. 316

DATE: **August 30, 2000**

MACHINE: **Model C Spike Driver**

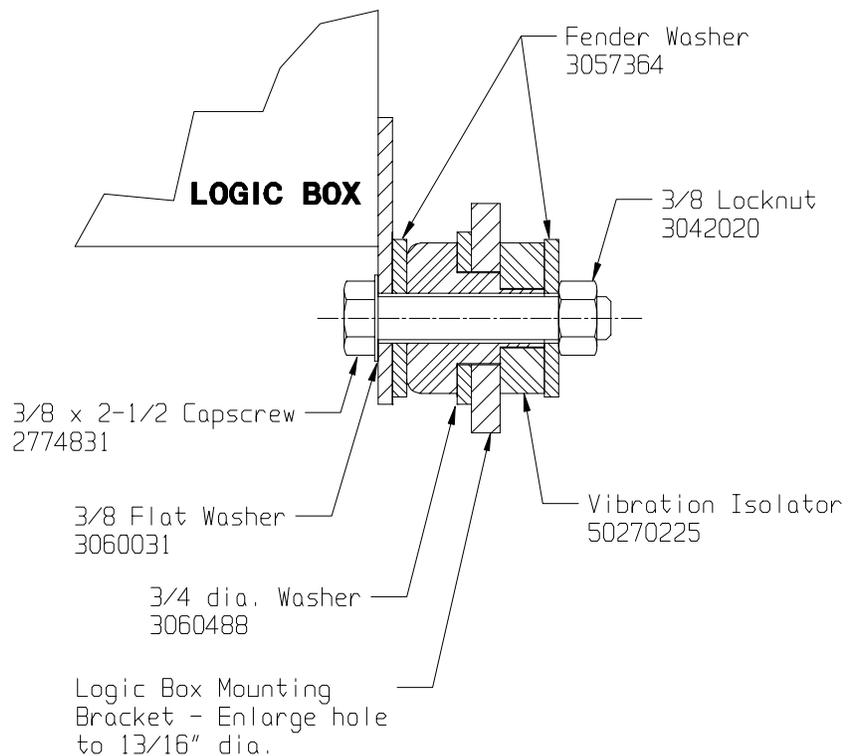

SERIAL

NUMBER(S): **Up to s/n 410279**

SUBJECT: **Logic Box Isolation Mount Kit - 98410073**

This Logic Box Isolation Mount Kit has been developed to reduce machine vibrations being transmitted to the logic box. Reducing vibrations in the logic box will help prevent failures due to intermittent open circuits in the circuit board to motherboard connections as well as other electrical connections.

The kit consists of 4 **Vibration Isolators, p/n 50270225, mounting hardware and instructions.** The existing logic box mounting holes must be enlarged to 13/16" diameter to receive the isolation mounts. Installation of this kit should take less than an hour.

Please contact your NORDCO Representative or the NORDCO Parts Department for pricing and availability.
