

## PRODUCT SUPPORT BULLETIN BULLETIN NO. 364

DATE: **December 1, 2002**

MACHINE: **Model M2 Ballast Regulator/Snow Clearing Machine**

SERIAL

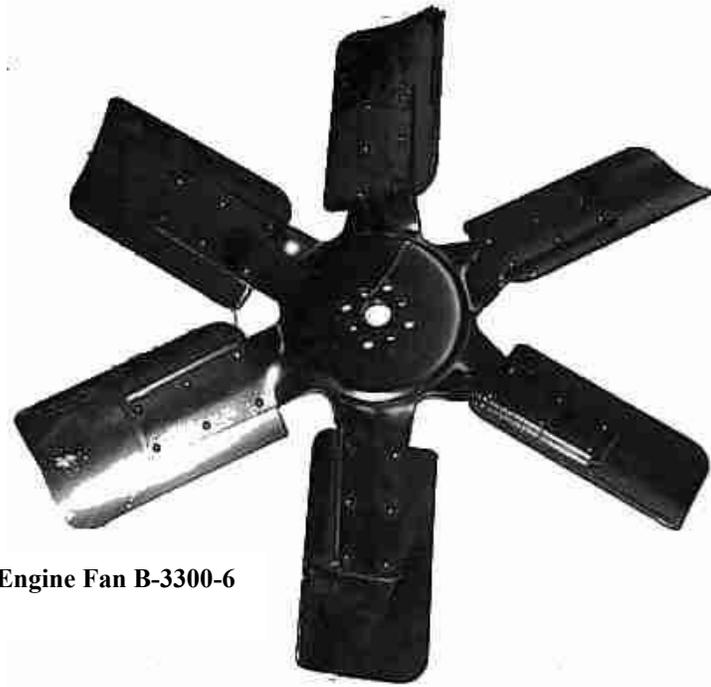

NUMBER(S): **9601 – 9916, M20101 – M20117, 800118 - 800127**

SUBJECT: **Replacement Steel Fan on Machines with Cummins Engines**

The engines on these machines were originally equipped with an aluminum radiator fan, p/n B-33300-1. These fans are subject to abrasive wear from dust blown up during machine operation and have a relatively short life.

To correct this problem, a **Steel Fan, p/n B-33300-6** is available as a direct replacement for the aluminum fan. This fan will have an increased service life when compared to the aluminum fan and is a direct replacement.

Please contact your NORDCO Representative or the NORDCO Parts Department for pricing and availability.
