

PRODUCT SUPPORT BULLETIN BULLETIN NO. 366

DATE: December 1, 2002

MACHINE: Model M and M2 Ballast Regulator and Snow Clearing Machine

SERIAL

NUMBER(S): Model M – 9712 and higher (includes M10101-M10106)

Model M2 – All except M20104-M20107 and M20110-M20117

SUBJECT: Cab Hose Seal Kit – A0618002

This kit has been designed to help eliminate dust from entering the cab during operation. It consists of rubber Bulkhead Seals that fit tightly around the hydraulic hoses where they enter the cab. The seals are secured to the cab floor by a steel frame. See **Figure 1**.

This kit, P/N A0618002, consists of a steel frame that must be welded to the cab floor, rubber bulkhead seals, sealant and instructions. All of the hoses to the control valves must be removed to install this kit. Installation should take about 16-24 hours.

Please contact your NORDCO Representative or the NORDCO Parts Department for pricing and availability.
