

# Aftermarket Parts Report

Current information on Nordco Maintenance-of-Way machine parts and kits

Issue 8 August, 2009

## Check website Kit Search for frequent updates

One of the most useful features of the Nordco website is the Repair and Upgrade Kit Search. Since the introduction of the Kit Search last November, we have continued to add new Maintenance-of-Way Machine Kits on a regular basis. Kits reduce downtime by making it easy for you to replace high-wear components and add the latest upgrades. Many kits are often preassembled, which means you replace a single element instead of multiple parts. To use the Kit Search visit [www.nordco.com](http://www.nordco.com) and go to **Parts**. Then click on **“Search for Repair and Upgrade Kit.”**

*Kits are available for all major Nordco MOW machine types, including this Spring Clip Applicator.*

*Search by keyword, machine type, part number, and key component - individually or in combination - to find the kits that are right for your application.*

Keyword	<input type="text"/>
Machine Type	<input type="text"/>
Kit Part Number	<input type="text"/>
Component Part Number	<input type="text"/>
<input type="button" value="Search"/> or <a href="#">view all</a>	

## Featured product: Cab Tube Upgrade Kit

**Part number:** 98760059

**Can be used with:** TRIPP  
Serial numbers 760162 - 760333

**What it does:** Upgraded tube and hose kit replaces two existing tubes; makes future change outs faster and easier.

**Description:** Kit includes two tubes, two hoses and one elbow. Hoses feature a protective, abrasion-resistant sleeve. Installation can be done in the shop or in the field.

## Parts in the spotlight...

Each month we will highlight new and particularly useful parts

**29300046 Anchor Chute Warning Plaque:** For Nordco BAAM Machines, serial numbers 690025 - 690055. The warning plaque is a visual reminder to the operator to keep the BAAM anchor chutes full to avoid damage to the escapement cylinders. See Nordco Product Support Bulletin 2009-007 for more information.

**52890001 Dust Hood Bumper Pad:** For all CX Hammers with Bulk Loader and Dust Collection System. New bumper pad material offers increased service life. (If your existing pad is worn, it should be replaced). The bumper pad helps protect the machine operator by cushioning the steel end of the dust hood. See Nordco Product Support Bulletin 2009-005 for more information.

*The Dust Hood Bumper Pad helps protect the machine operator.*

## Featured product: Oil Cooler Isolation Kit

**Part number:** 98690018

**Can be used with:** BAAM  
Serial numbers 690025 - 690071

*Nordco BAAM*

**What it does:** Improved method for attaching oil cooler helps extend the life of the cooling tubes and fan.

**Description:** Kit includes sandwich-type rubber mounts to prevent any frame or hydraulic shocks from being transferred to the oil cooler and components. Install in the shop or field.
