Current information on Nordco Maintenance-of-Way machine parts and kits

Issue 41 May, 2012

## “Critical Component” lists help in planning machine repair & maintenance

Maintenance-of-Way Machines are made up of thousands of parts. Each component serves a purpose - but some are more important than others. We have created lists of “critical” components for many Nordco machines to help you plan maintenance and determine which parts to keep on hand. These are the items absolutely necessary to keep the machine on the move and performing key functions. Go to the Maintenance-of-Way Machinery section at [www.nordco.com](http://www.nordco.com) and select Parts. Then click on Critical Machine Components for available machine lists.

98840007 Cobra Brake Shoe Kit.

For a complete list of machine kits, go to Parts at [www.nordco.com](http://www.nordco.com) and click on Search for Repair and Upgrade Kits.

# “Legacy” machine manuals are now online

Visit a rail or tie gang and it's not unusual to see some vintage Nordco machines still in operation many years after manufacture. Like any equipment they require periodic service and replacement parts. Electrical, mechanical, hydraulic and operations manuals for many of these older machines are now available online. This is the same information found on our “Legacy Machine” DVD. Go to the **Parts** page in the Maintenance-of-Way Machinery section at [www.nordco.com](http://www.nordco.com) and select **Online Parts Manuals**. Manuals are organized by machine type, model and serial number. If you don't see the manuals for your machine, contact **Nordco Parts** and we'll locate the information you need.

Manuals for older Nordco machines are now available at [www.nordco.com](http://www.nordco.com).
