### Rail Lift Guide now standard on TRIPP, aids tie insertion and extraction

The Rail Lift Guide is now standard equipment on Nordco TRIPP machines. Bright orange fluorescent rods serve as a visual point of reference for the machine operator when inserting or extracting ties. Adding this capability to an existing machine is easy with the **98760136 Rail Lift Guide Kit**. Simply install brackets on both sides of the rail lift frame and then attach the rods.

**WEAR PARTS**

**Featured Product:  
Railroad Bonding Bits**

Railroad switch and signal work groups use these bits to drill holes in rail for bonding wires. The bits are made from high-strength cobalt steel and are protected with a coating of bronze oxide. Bits include 140° notched point for easy starts. Available with round or flat shanks.

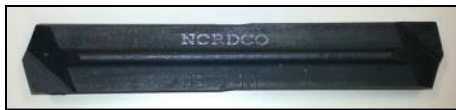

Round (top) and flat shank bonding drills shown approximate actual size.

**17729100 3/8" BONDING DRILL FLAT SHANK**

**17729110 3/8" BONDING DRILL ROUND SHANK**
