

HYDRAULIC TOOL MANIFOLD KIT

Nordco part number 98330802

For all SP2R Dual Rail Spike Pullers;
selected other machines

This kit provides a machine mounted connection for a hand-held hydraulic spike pulling tool and other implements.

- Hydraulic driver spike puller tools are easier to manipulate, faster and more efficient than manual hand-held pry bars.
- Easy to install in field or shop.
- Powers one 10-GPM or two 5-GPM tools.
- Use with all Nordco SP2R machines. Mounts on rear of machine.
- Can also be used with Nordco V-Clip Applicator (NVCAR), Spring Clip Applicator (NSCA), Curve Gang Spiker (CGS) and other piston pump-driven Nordco machines. For applications with these machines and for use with tools other than hydraulic spike pullers, consult Nordco.
- Includes manifold block, hoses, hydraulic connections, hardware, mounting bracket for pulling tool and manifold and installation instructions.
- Optional Hydraulic Spike Pulling Tool available (Nordco P/N 500748).

Nordco SP2R Dual Rail Spike Puller.

98330802 Hydraulic Tool Manifold Kit. The kit can also be used with other Nordco machines, including the NVCAR, NSCA and CGS in addition to the SP2R.

The kit includes a mounting bracket for the hydraulic spike pulling tool. Users can provide their own tool like the one shown at right, or select the optional 500748 Spike Pulling Tool offered by Nordco, pictured below. This tool includes a 12-foot hose.
