

SPIKE TRAYS AND TRAY HEADS WITH CARBIDE TILE INSERTS

Nordco has introduced the following components for use on Maintenance-of-Way Machines. Used with Nordco CX Hammer, SS Spiker, Model C Spiker, 99C Spiker, C-CX Conversion; all serial numbers.

PRODUCT DESCRIPTION

Nordco has developed new, longer lasting Spike Trays and Tray Heads with durable carbide tiles installed on wear surfaces. The addition of the carbide tiles reduces machine downtime by extending the life of the Tray and Tray Head. The Trays and Tray heads are available as complete, preassembled kits that can be changed out in one operation. Tray Head Assemblies, Tray Heads and Trays can also be purchased individually. **IMPORTANT:** Standard tray assemblies utilize a “universal” spike tray for both right and left hand units. Due to the placement of the tiles, the carbide assemblies include either a right or left hand tray.

Nordco CX Hammer.

Carbide tiles are placed along edge of Tray.

Bolt-On Spike Tray Assembly.

PART NUMBERS AND PRICING

Bolt-on Tray Assemblies include Tray, Tray Head Assembly, Bolt-on Guide, Feed Cylinder and Pusher Block Assembly:

- 98411190 RH BOLT-ON 5/8 CUT SPIKE TRAY ASSEMBLY WITH CARBIDE INSERTS**
