

A/C Dual Condenser Guard Kit

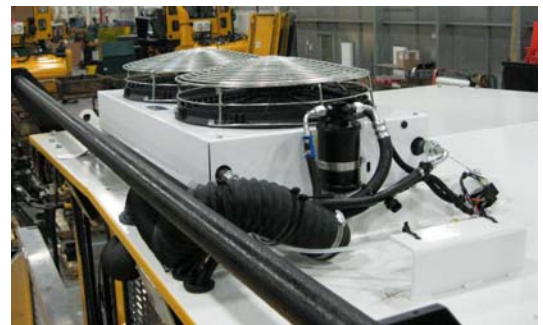

Nordco has introduced the following kit for use on the CX Hammer Production Spiker.

A/C DUAL CONDENSER GUARD KIT

Nordco part number 98412440

This kit makes it possible to retrofit selected CX Hammers to protect the rooftop dual air conditioner condenser. The dual guards help shield the condenser fans from loose spikes that may fall from the crane magnet during spike loading, as well as other debris that could strike the fan assemblies on the Red Dot A/C unit. It is an easy and cost-effective way to prevent potentially serious and expensive damage.

- Install in the field or shop.
- Use with any CX Hammer after serial number S/N 410592 that includes Red Dot air conditioner with rooftop dual condenser unit.
- Includes all hardware needed for installation.
