

Crossing Alarm Switch Kit

Nordco has introduced the following kit for use on Maintenance-of-Way Machines.

CROSSING ALARM SWITCH KIT

Nordco part number 98690014

Machine serial numbers:

All BAAM Anchor Applicators

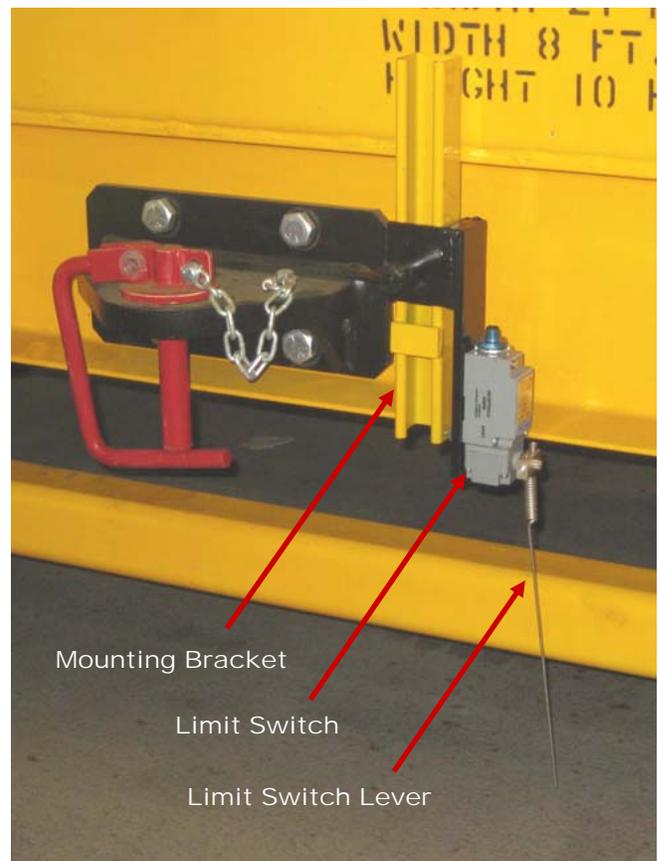

This kit provides an audio and visual alarm to the operator of a BAAM Anchor Applicator when the machine nears a crossing. This gives the operator time to raise the workhead so it doesn't come in contact with the crossing, thereby preventing damage to the unit. The limit switches mount to the front and back of the machine for crossing detection in either direction.

- Install in field or shop.
- Cost-effective way to help prevent potentially major damage to machine.
- Includes 2 Limit Switches, 2 Mounting Brackets, 2 Limit Switch Levers, LED Light, Warning Buzzer, hardware and installation instructions.

Contact Nordco Parts for more information

Nordco BAAM

The Crossing Alarm Switch Kit 98690014 includes a Mounting Bracket and Limit Switch that is attached to the front and back of the machine. The Limit Switch Lever ("whisker") extends downward to the track to detect the crossing.
